Georgian · ქართული

CoCart Mono is a monospaced typeface for shop prices, order numbers and codes. We need someone who reads Georgian every day to tell us where our letters look wrong, unclear or odd. Nothing here needs design knowledge: read it as you would a receipt or a shop page.

HOW TO FILL IT IN AND SEND IT BACK

1. Type into the boxes and tick the checkboxes. Any PDF reader works: Adobe Acrobat Reader, macOS Preview, or your browser.
2. Save the file. In a browser, use Download or Print > Save as PDF so your answers are kept.
3. Email it to hello@cocartheadless.com, or attach it to a GitHub issue at github.com/cocart-headless/cocart-mono-font/issues (choose "Native review").

Prefer paper? Print at 100%, write on it, then send a photo or scan the same way.

Reviews are not credited by name. If your review leads to a fix and you would like credit, say so and you will be listed in the release notes.

4 · QUESTIONS

1. Which Mkhedruli letters look wrong or like another letter?

2. Do the Mtavruli capitals (last row of the grid) read naturally in ALL-CAPS text?

3. Are the archaic letters (□–□) acceptable, or should they be redrawn?
