Uzbek · O‘zbekcha

CoCart Mono is a monospaced typeface for shop prices, order numbers and codes. We need someone who reads Uzbek every day to tell us where our letters look wrong, unclear or odd. Nothing here needs design knowledge: read it as you would a receipt or a shop page.

HOW TO FILL IT IN AND SEND IT BACK

1. Type into the boxes and tick the checkboxes. Any PDF reader works: Adobe Acrobat Reader, macOS Preview, or your browser.
2. Save the file. In a browser, use Download or Print > Save as PDF so your answers are kept.
3. Email it to hello@cocartheadless.com, or attach it to a GitHub issue at github.com/cocart-headless/cocart-mono-font/issues (choose "Native review").

Prefer paper? Print at 100%, write on it, then send a photo or scan the same way.

Reviews are not credited by name. If your review leads to a fix and you would like credit, say so and you will be listed in the release notes.

ABOUT YOU (OPTIONAL, NEVER PUBLISHED)

Name

Email, only for follow-up questions

OVERALL

- [ ] Reads naturally
- [ ] Mostly, a few problems below
- [ ] Serious problems

1 · EVERY CHARACTER (2)

Tick the box on any character that looks wrong, then say what is wrong in the box below the grid.

ʻ U+02BB	ʼ U+02BC

What looks wrong? Give the character and what it should look like.

2 · LOOK-ALIKE PAIRS

Are these easy to tell apart at a glance?

'	ʻ	ʼ	'	ʻ	ʼ

Clear Confusing

Which pairs are confusing, and why?

3 · REAL SHOP TEXT

Read these at each size. Note anything slow to read, or any mark sitting in the wrong place.

What was slow to read, or out of place? Say which size.

4 · QUESTIONS

1. Do the accents sit at the right height and on the right side of each letter?

2. Does any letter look like a different letter, or like one from another language?

3. Are the quotation marks and the currency sign the ones you use?

4. The prices, date, months and weekdays in section 3 come from your browser's own Uzbek data. Do they read naturally?
